

Specifically designed for SMEs, SAP Business One is the perfect alternative to accounting only systems

SAP Business One

Have you outgrown your accounting software? If your accounting system is holding your business back, **SAP Business One** is the perfect upgrade solution to help kick start your business growth.

SAP Business One is specifically developed for the requirements of small to medium sized organisations. It is a single integrated solution covering all the critical business aspects including sales, services, stock control, financials, RM, operations, manufacturing and reporting.

Does your business have any of the following?

- More than 10 users?
- Multiple Stock locations?
- Multiple warehouses?
- Serial number & patch processing?
- Multi-currency & multi language?
- Extensive budgeting?
- Period accounting?
- Unlimited companies?
- Over 80,000 transactions?
- Landed costs?

If any of the answers are **yes**, it's probably time to consider upgrading. Culex has completed many projects with organisations who have outgrown their accounting system and required an alternative software solution to help develop their business and aid in their future growth.

About CULEX

Culex is an independent solutions provider specialising in the implementation and development of SAP Business One.

We have offices in Chester, Cambridge, and Galway and have undertaken projects with a variety of companies, from small single sites to pan-European roll-outs.

Our extensive business experience and software expertise enables us to consistently deliver a service of the highest quality, which in turn, enables our clients to maximise their return from their software investment.
